

Dr Radouane Draï

President of the scientific council

CRTI RESEARCH ACTIVITY

According to the SCOPUS database, CRTI researchers published their research work through submitted articles and "Conference papers" comprise respectively 54% and 46% from the whole documents of the center registered in this database. The engineering, physics, materials science and computer science are the most studied fields by the center's researchers.

It is reported that the CRTI is a member of the world organization for the NDT (ICNDT), a founder member of the African federation of NDT (AFNDT), a member of the American Society NDT (ASNT) and a member of the International Welding Institute (IIW).
